

# Learning To Divide – 1.5

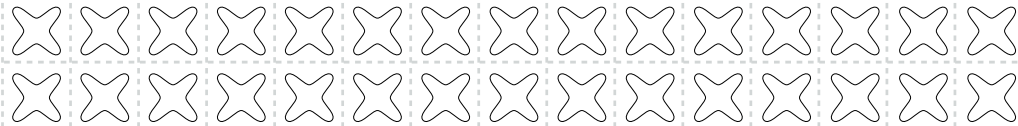

When we divide, the answer doesn't always work out perfectly.  
The leftover part is called "the remainder."

Color the graphics to show the answer. Write X over the remainder:

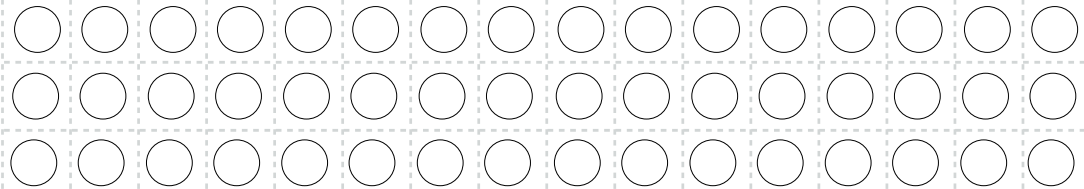

Example:  $32 \div 5 = 6R2$

1)  $30 \div 4 =$

2)  $48 \div 5 =$

3)  $60 \div 7 =$
