

The Times Tables — 4.2

It can take A LONG TIME to fully master the Times Tables!

1. $7 \times 5 = \square\square$

2. $5 \times 8 = \square\square$

3. $5 \times 9 = \square\square$

4. $5 \times 7 = \square\square$

5. $3 \times 5 = \square\square$

6. $5 \times 6 = \square\square$

7. $7 \times 2 = \square\square$

8. $5 \times 10 = \square\square$

9. $7 \times 3 = \square\square$

10. $2 \times 8 = \square\square$

11. $2 \times 9 = \square\square$

12. $4 \times 5 = \square\square$

13. $7 \times 11 = \square\square$

14. $10 \times 8 = \square\square$

15. $3 \times 11 = \square\square$

16. $0 \times 6 = \square$

17. $4 \times 4 = \square\square$

18. $5 \times 12 = \square\square$

19. $3 \times 9 = \square\square$

20. $1 \times 9 = \square$

21. $7 \times 10 = \square\square$

22. $4 \times 6 = \square\square$

23. $7 \times 7 = \square\square$

24. $6 \times 8 = \square\square$

25. $3 \times 3 = \square$

26. $2 \times 12 = \square\square$

27. $2 \times 11 = \square\square$

28. $6 \times 6 = \square\square$

29. $6 \times 3 = \square\square$

30. $7 \times 9 = \square\square$

31. $7 \times 4 = \square\square$

32. $4 \times 8 = \square\square$

33. $4 \times 9 = \square\square$

34. $7 \times 6 = \square\square$

35. $2 \times 7 = \square\square$

36. $3 \times 8 = \square\square$

37. $10 \times 10 = \square\square\square$

38. $6 \times 2 = \square\square$

39. $6 \times 12 = \square\square$
